

# Course Set Up for World's Longest Driver Contest

This page describes the things the course superintendent needs to do to set up for the contest.

## Contest Hole

- 1) The "Contest Hole" should be a hole with a fairway that is as wide open as possible since some of the shots will be off-line!
- 2) It is best if it is a Par 5. But if no Par 5 is wide enough, a Par 4 is OK.
- 3) The tees should be "all the way back" for this hole. Ladies tees can be proportionally closer.
- 4) There should be 4 holes spread out on the green with one of them in the most difficult putting location, likely toward a back corner. The most difficult hole should have a different color flag while the other 3 holes should all be the same color (suggest white). The goal is for the 3 white-flagged holes to be in easily accessible locations.
- 5) A flag or marker should be placed in the middle of the fairway 300 yards from the tees, or 150 yards from the green, whichever is closer to the green.
- 6) A "longest drive" stake-and-pencil should be placed out in the fairway about 200 yards from the tees. Note that this should not replace the normal "longest drive" hole. This distance contest is only for the 5-Foot Driver results.
- 7) No other contests can be conducted on this hole. It is important that everyone is motivated to donate \$20 per foursome to swing the long driver.

## Driving Range Set Up

The only unusual thing that needs to be done for the Driving Range Practice Shots is a "double-wide" hitting bay, preferably in the middle of the range. Plenty of driving range balls should also be available.

If you have any questions, please don't hesitate to ask.
